About Poseidon

Born in Scandinavia. Trusted Everywhere.

At Poseidon, we don't just build regulators—webuild lifelines. Since 1958, we've developed breathing systems for divers who work, train, explore, and rescue in some of the world's harshest conditions. We were founded in Sweden, where cold, dark water isn't the exception—it's the starting point.
Our gear has never been about flash. It's about function.
About keeping you safe.

About lasting a lifetime—and then some.

In fact, we're still servicing regulators built in the early 60s. We don't believe in throwaway design. We believe in building products that stay with you, dive after dive, year after year.

When you choose Poseidon, you're choosing gear that's trusted by military divers, public safety teams, technical explorers—and thousands of everyday divers who simply want to feel safe and supported underwater.

Our job is to make sure you don't have to think about your gear.
That way, you can focus on the dive.

Our Regulator Philosophy

Let Go. Dive In.

When your equipment just works, you get to experience what diving is really about: silence, weightlessness, focus. That's the world we design for. Poseidon regulators are built to disappear—no knobs to adjust, no resistance, no unnecessary complexity.

And while they may look simple on the outside, they're the result of over 60 years of careful thinking, rigorous testing, and real-world feedback from the people who use them in the most demanding places on Earth.

Whether you're diving ten meters/32 ft in the tropics or pushing past sixty meters/167 ft in the Arctic, your regulator should feel the same: smooth, silent, secure.

We don't rush out new models every year. We refine what already works.

That's why a Poseidon regulator isn't just gear—it's an investment. In performance, in safety, and in peace of mind. For life.

We believe great design is invisible.
You only notice it when it's not there.

Our Technology – Designed for Divers

Why So Different?

Because we never followed the crowd.
At Poseidon, we didn't try to improve existing regulators—we reimagined what a regulator could be. From the inside out, our systems are built with a different philosophy:
function before fashion, engineering before trend.

Built to Last. Engineered to Disappear.

Breathing underwater should feel effortless.
That's why every Poseidon regulator is designed to perform flawlessly—**every time, for a lifetime.**
We start where others don't: in real conditions. Ice diving. Deep diving. Military operations. Commercial work. We engineer for the harshest environments—so that **every diver**, from beginner to explorer, can trust our gear with their life.

When your gear lasts a lifetime, it's not a cost. It's a companion

What Makes Poseidon Different?

✅ **Zero tuning required**
No knobs. No levers. No adjustments. Just breathe.

✅ **Side-exhaust design**
Bubbles stay out of your vision. No front purged induced free-flows. No up and down on the regulator, breathes equaly good if you look down or up.

✅ **Warm and cold water readiness**
Engineered for any temperature.
No switches, no compromises.

✅ **Balanced airflow**
Unmatched breathing comfort at any depth, in any position.

Built with Purpose. Backed by Decades.
What you **don't** see is just as important:
– Advanced, freeze-resistant design
– Unique airflow pathways
– Hand-assembled quality
– A design so right, it doesn't need yearly upgrades
We still service regulators from the 1960s—not because we have to, but because we can. That's not tradition. That's **engineering that respects your time, your money, and your trust.**

The Regulator Lineup – Explained

Xstream

When You Want the Best—And Nothing Less.

Xstream doesn't shout. It doesn't need to. It simply delivers—whether you're diving for pleasure, training in arctic lakes, or descending past 100 meters/328 ft.

This is the regulator trusted by elite military divers, polar scientists, cave explorers, and rescue teams. But its true strength is how quietly it performs: smooth, natural breathing at any depth, in any position, under any pressure.

Why Divers Trust It:

- Certified to 200 meters/656 ft—first in the world
- Compact and streamlined
- Self-balancing valve: perfect breathing even on near-empty tanks
- Thermo Dynamic Anti-Freeze
- Side purge = no free flow, no bubbles in your face
- Gas-ready: Air, Nitrox, Trimix, 100% O2
- No knobs or settings. Just breathe.

"Xstream doesn't just perform —it disappears."

Perfect for:

Deep, technical, cold, demanding environments.

Also loved by:

Recreational divers who want the best breathing experience.

Cyklon X / 5000

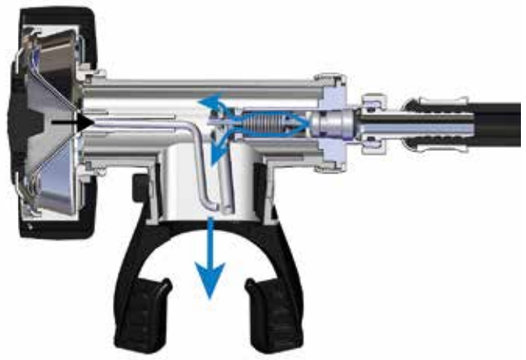

A True Classic, Built for a New Generation.

Cyklon has been part of diving history since

1958—and it's still one of the most trusted regulators in the world. Why? Because it works. Because it's simple. Because it's built like a tank—and breathes like a dream.

The new Cyklon X keeps the soul of the original, but adds modern refinement, comfort, and materials. Whether you choose the X or the legendary 5000, you're diving with something proven. Something real.

Why Divers Trust It:

- Side-purged second stage = clear view, no free flow, ambidextrous
- Iconic durability – still used in dive schools and public safety teams
- Hose mount left or right
- Available in lightweight polymer or full metal

Perfect for:

Recreational divers, instructors, sidemount, cold water schools

Also great for:

Photographers, divers who love low-maintenance design.

"Simple. Rugged. Ready for anything."

Jetstream Mk3

Built for Demand. Trusted by Professionals.

Jetstream Mk3 is all about power and control. It's

been the go-to for military, rescue, and high-air-demand divers for decades. Why? Because it delivers high flow, low effort, and rock-solid reliability in even the most chaotic dives.

And it's still surprisingly simple: just put it in, breathe, and go.

Why Divers Trust It:

- Pneumatically balanced for high-performance airflow
- Cold water ready with field-proven durability
- Internal dive/surface switch
- Designed for heavy breathing loads and rapid ascent scenarios
- Works perfectly with Xstream first stage
- Also available as integrated Octopus or Full Face Mask
- Robust Design

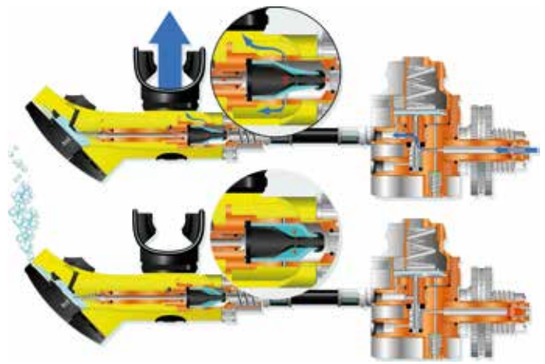

"When conditions get tough, Jetstream stays steady."

Perfect for:

Rescue, military, cold water, high workload dives

Also excellent for:

Recreational divers who want value ease of breathing with a robust design.

Regulator Comparison Table

Model	Breathing Effort	Cold Water	Gases	Side Exhaust	Nitrox	Max Depth	Ideal For
Xstream	★★★★★	Yes	Air, Nitrox, O2, Trimix	Yes	100 %	200 meter /656 ft	Tech, cold, pro, high-flow, rec excellence
Cyklon X	★★★★☆	Yes	Air, Nitrox, Trimix	Yes	40 %	50 meter /164 ft	Rec, pro, side-mount, instructors
Cyklon 5000	★★★★☆	Yes /antifreeze cap accessory	Air, Trimix	Yes	--	50 meter /164 ft	Rec, pro, side-mount, instructors
Jetstream Mk3	★★★★★	Yes	Air, Nitrox, Trimix	Yes	40 %	50 meter /164 ft	Pro, rescue, cold, high-flow
Atmosphere FFM	★★★★☆	Yes	Air, Nitrox, Trimix	Side / Full	40 %	50 meter /164 ft	Ice, safety, comms, warmth

Build Your Own Regulator Setup

Profile	Recommended Regulator
New Diver	Cyklon X or Cyklon 5000
The Explorer	Xstream
Instructor	Jetstream Mk3 or Cyklon X
Cold Water Specialist	Xstream or Atmosphere
Photographer	Cyklon X or Xstream
Safety / Rescue Diver	Jetstream Mk3 + Atmosphere

Start with how you dive — we'll guide the rest.

Your dive gear should support you—not the other way around. That's why we've made it easy to build a system that matches your goals, style, and environment.

☑ Step 1: Choose Tank Configuration

- Single Tank – For travel, sport, and simplicity
- Twin Tanks – For redundancy and gas management
- Sidemount – For freedom, trim, and flexibility
- Stage Bottles – For deco, bailout, or extended range

☑ Step 2: Choose Your Regulator

- Xstream – High performance, deep and cold
- Cyklon X – Rugged, reliable, refined
- Jetstream Mk3 – High flow, high trust
- Atmosphere – Comfort, safety, and visibility

☑ Step 3: Personalize Your Setup

- Second stage – Octopus or necklace
- First stage - Din / yoke
- Hose routing – Left/right, long/short + adapters
- Monitoring – SPG, transmitter, console
- Accessories – Bolt snaps, elbows, Full Face Mask, bungees
- Cold water? Add anti-freeze cap
- Nitrox/Oxygen? Choose compatible models

Scan the QR code or visit poseidon.com/configurator

You dive your way. We help you build it.

Standard configuration

Visit the website configurator and make your selections for each product.

Our Standard regulator setup is built for everyday recreational diving—simple, reliable, and ready for anything from local shore dives to holiday boat dives. The configuration includes one first stage, two second stages (primary + backup), and a pressure gauge (manometer), giving you a familiar, confidence-inspiring setup with clean hose routing and easy handling in the water.

Want to make it your own? Scan the QR code to open our online configurator and tailor the setup to your diving—choose different first and second stages, adjust hose lengths, select your preferred gauge solution, and add smart extras like bolt snaps, double enders, angle adapters, octopus holders, and more.

Build Your Own Regulator Setup

Streamlined configuration

Visit the website configurator and make your selections for each product.

Our Streamlined setup is designed for recreational divers who want a cleaner, more comfortable, and more efficient hose layout. The primary second stage routes neatly under the arm and sits close to the body, reducing snag risk and keeping everything tidy in the water. A fixed-angle adapter can be used to improve the hose angle at the second stage, helping reduce jaw fatigue by removing “tug” on the mouthpiece. The backup second stage is positioned under the chin for instant access, and the pressure gauge (SPG) is typically clipped to a waist D-ring—secure, protected, and easy to check.

Want to tailor it to your preferences? Scan the QR code to access our online configurator—swap first and second stages, adjust hose lengths, choose your gauge setup, and add practical extras like bolt snaps, double enders, angle adapters, octopus holders, and more.

Longhose configuration

Visit the website configurator and make your selections for each product.

Our Longhose setup is a popular choice for divers who want a cleaner, more controlled gas-sharing solution than a traditional octopus. The primary second stage is fitted with a long hose that routes close to the body, reducing drag and keeping the regulator easy to deploy. The backup second stage sits on a short hose, worn on a necklace under the chin—protected, streamlined, and instantly available. In an out-of-air situation, the primary is donated smoothly with one hand while the backup is immediately ready for you.

Want to tailor it to your preferences? Scan the QR code to access our online configurator—swap first and second stages, adjust hose lengths, choose your gauge setup, and add practical extras like bolt snaps, double enders, angle adapters, octopus holders, and more.

Build Your Own Regulator Setup

Doubles configuration

Visit the website configurator and make your selections for each product.

Our Doubles setup is built for divers using twin cylinders with a manifold—offering clean hose routing, redundancy, and a proven gas-sharing approach. The primary second stage is fitted with a long hose from the right post for smooth donation, routed close to the body and typically stowed by clipping it neatly when not in use. The backup second stage is on a short hose worn on a necklace under the chin, supplied from the left post—always protected and instantly available. The BC inflator hose and pressure gauge are typically kept shorter and routed tight to the diver, with the SPG clipped to the waist D-ring for easy checks and minimal snag risk.

Want to tailor it to your preferences? Scan the QR code to access our online configurator—choose first and second stages, adjust hose lengths, select your gauge setup, and add practical extras like bolt snaps, double enders, angle adapters, octopus holders, and more.

Sidemount configuration

Visit the website configurator and make your selections for each product.

Our Sidemount setup is designed for divers who want flexibility, streamlined hose routing, and easy cylinder management. Because sidemount divers rig their cylinders in different ways, SPG mounting and hose routing can depend on how your valves are oriented (valve outlets facing up or down, and handwheels inboard or outboard). For that reason, this setup is prepared to be easily tailored so your SPGs and hoses sit cleanly, remain protected, and are simple to read and access throughout the dive.

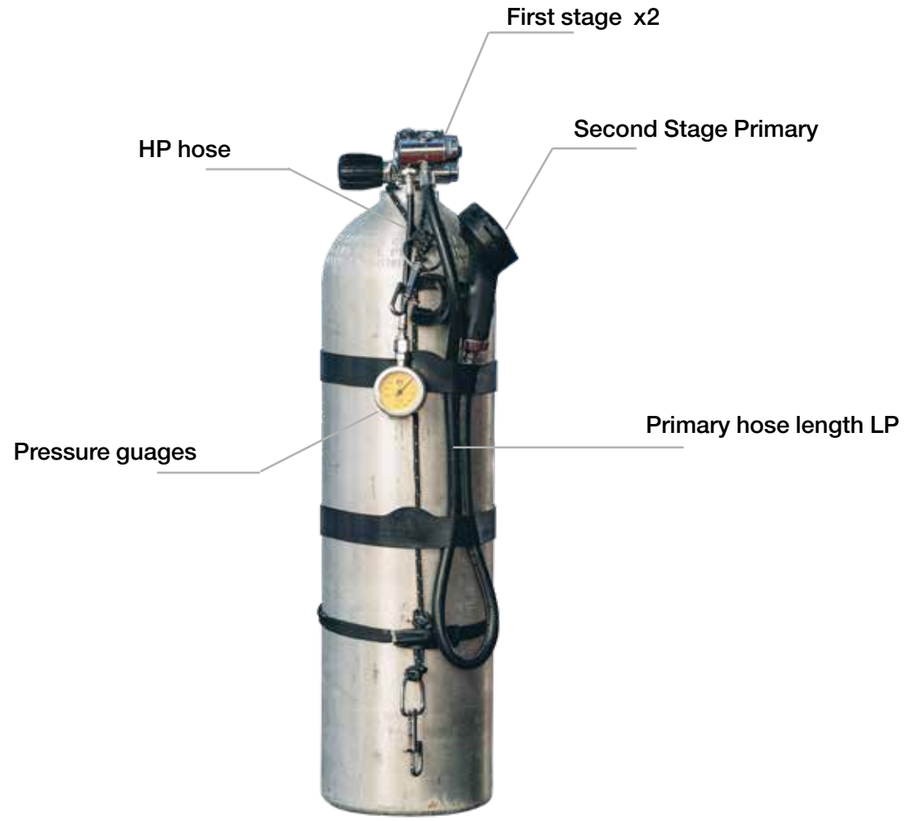

Want to tailor it to your preferences? Scan the QR code to access our online configurator—choose first and second stages, adjust hose lengths, select your gauge setup, and add practical extras like bolt snaps, double enders, angle adapters, octopus holders, and more.

Build Your Own Regulator Setup

Stage tank configuration

Visit the website configurator and make your selections for each product.

Poseidon second stages are especially well suited for sidemount diving because they don't have a fixed "up" or "down" orientation. That gives you multiple clean options for routing regulators and hoses—so you can build the configuration that fits your harness, cylinder position, and personal preference best.

Our Stage tank setup is designed for stage, decompression, and bailout use—when you're relying on a separate cylinder for part of the dive. On many stage and deco dives, you may spend a significant amount of time breathing from these regulators, so reliability and correct performance still matter, even in shallower water. A well-chosen stage setup gives you dependable breathing, clean handling, and a practical configuration that's easy to deploy, stow, and manage throughout the dive.

Want to tailor it to your preferences? Scan the QR code to access our online configurator—choose first and second stages, adjust hose lengths, select your gauge setup, and add practical extras like bolt snaps, double enders, angle adapters, octopus holders, and more.

3281-100	Double ender 100, metal

DOUBLE ENDER 120 METAL

Art. no.	Description
3281-120	Double ender 120, metal

Regulators & Gauges

GAUGES

The gauges come in two different colors, the traditional yellow dial and the new with a black dial. Both versions come with either bar or psi and they are also available as double console with a depth meter.

MODEL:

Cirrus Pressure Gauge with Hose

Pressure gauge Nkd BAR

Double Console in Black

Pressure gauge Nkd PSI

Pressure Gauge in Black

Manometer Mini BAR

Double Console in Yellow

Compass Cirrus

Art. no.	Description
7929	Pressure gauge Cirrus 300 bar w 80cm/32in hose
7929 PSI	Pressure gauge Cirrus 4350 psi w 32in/80cm hose
0600-001	Double console 300 bar/4350 Psi m/f black w 80cm/32in hose
0600-000	Pressure Gauge 300 bar/4350 Psi, black w 80cm/32in hose
8671	Twin Console Cirrus Yellow 300 bar w 80cm/32in hose
0600-010	Pressure Gauge Naked Yellow 300 bar, w 20cm/8in hose
0600-013	Pressure Gauge Naked Yellow 300 bar, w 66cm/26in hose
0600-011	Pressure Gauge Cirrus Naked Yellow, 4350 psi, w 8in/20cm hose
0600-014	Pressure Gauge Cirrus Naked Yellow, 4350 psi, w 26in/66cm hose
0600-030	Manometer Black Mini BAR
8672	Compass Cirrus Cover + Holster

TECHNICAL FEATURES:

Cirrus Pressure Gauge with Hose
This 300 bar (4350 psi) pressure gauge is a small model that will not be in the way during the dive. Made of robust metal and packed with Poseidon's 300 bar kevlar reinforced hose.
Also available with PSI scale.

Pressure Gauge in Black
Our pressure gauge in a new design, with black display and fluorescent numbers. Pressure gauge shows both BAR and PSI. Delivered with a 80 cm HP hose.

Double Console in Black
Our double console in a new design, with black display and fluorescent numbers. Pressure gauge shows both BAR and PSI. Comes with a 80 cm HP hose.

GLOSSARY OF TERMS USED

Balanced – this means that the regulated pressure is independent from the upstream pressure, e.g. IP independent from cylinder pressure, or breathing pressure independent from IP. The conventional way to obtain this is to arrange the valve in such a way that the upstream pressure either: acts only on surfaces perpendicular to the opening and closing direction, thereby having no effect on opening and closing forces; or the upstream pressure leads through the valve to an opposite surface of equal area, leading to an automatic equalisation (balancing) of forces in the opening and closing direction.

Either way, it leads to a more stable performance and higher regulating precision.

Upstream valve vs. downstream valve – an upstream valve opens in a direction opposite of the flow direction which will be established when the valve opens.
A downstream opens in the same direction as the subsequent flow. An upstream valve will seal tighter and tighter with an increasing upstream pressure, while a downstream will open when upstream pressure reaches a certain threshold pressure.

SCUBA regulators with upstream valves must have something acting as a pressure relief valve somewhere in the line, to ensure that explosions are not caused in case of an excessive pressure. Downstream valves will open spontaneously, but if used, for example, in 2nd stages, will be more prone to start free-flowing under the same circumstances.

p/v loop, breathing diagram - A p/v loop is a way to visualise a regulator's breathing performance by plotting the breathing pressure over the displaced volume. Most often, the breathing starts with an inhalation to the right at the x-axis, and the inhalation forms a graph ideally close to the x-axis. When exhalation starts, the graph plotter turns and goes back again on the positive side of the x-axis until the inhaled volume has again been exhaled. This then forms a "pressure/ volume loop". The x-axis intersects with the y-axis exactly at the actual pressure at depth, and can be said to be the target regulator pressure. If both the inhalation and exhalation curve did not deviate from the target pressure whatsoever, we would have a perfect regulator, with no inhalation- or exhalation-resistance.

Norsok U-101 – Since the EN 250 standard only statesdynamic performance testing to a maximum depth of 50m, and accordingly requires a maximum approved diving limit to 50m, it cannot be used for type approving regulators capable of more. The Norwegian Off-Shore industry has established standards similar to the EN 250 which describes testing down to 400m. This standard was accepted by the notified body to be used to tested the first ever Open Circuit SCUBA regulator to be approved for use down to 200m – the Xstream.
The standard can be viewed at: http: //www.standard.no/pro-norm-2/data/f/0/01/49/1_10704_0/U-101-N.pdf

SE7EN+ ONE MACHINE. FOR EVERYONE.

”Basics”

All essentials are incorporated, giving you everything necessary to kickstart your adventure.

“Optional Components”

Enhance your SE7EN+ experience with a variety of optional selections. Take advantage of the opportunity to customize and elevate your journey beyond expectations.

“SE7EN+ Packages”

Elevate your diving experience with our optional packages crafted for extended and more immersive underwater exploration.

Opt for one of two add-ons tailored for divers seeking longer bottom times and deeper dives, guaranteeing maximum enjoyment with each descent.

“Accessories”

Complete your setup by adding a variety of optional accessories that allow you to customize it according to your preferences.
From covers and handles to stands and cylinder QMRs - the possibilities are endless! Don’t settle for a generic setup when you can make it uniquely yours with these personalized additions.

KEY PERFORMANCE FEATURES

- Dive closer to marine life for a more intimate underwater experience
- Enjoy significantly more time underwater with optimized gas consumption
- Unmatched safety ensured through patented technology for a secure dive
- Demonstrated reliability with a proven track record in diverse conditions
- Adapt the system to evolving needs with its expandable and customizable features
- Suited for both recreational and 100-meter technical rebreather diving
- Extended comfort with a patented mouthpiece featuring a bailout valve
- Real-time monitoring and control through an advanced Dive Management System
- Plug-and-play compatibility with Dive-by-Wire technology for effortless setup
- Accurate and durable oxygen monitoring with Solid State O2 Sensor technology
- Stay connected with Bluetooth for wireless data transfer and updates
- Streamlined start-up with an automatic testing procedure for reliability
- Dive planning and analysis made easy with the Poseidon Reef App

POSEIDON SE7EN CUSTOM-BUILD:

Art. no.	Name	Description
6012-010	POSEIDON SE7EN	EU version incl. battery charger.
6012-011	POSEIDON SE7EN	US version incl. battery charger

For EU orders, the Poseidon SE7EN must ship with cylinders from the factory. Cylinders are not included within either the EU or US article numbers and cylinder type must be specified at the time of ordering for EU purchases.

POPULAR ACCESSORIES:

Art. no.	Name	Description
0005-100	BCD QMR	Designed for easy assembly. The ideal solution for quick BCD attachment
0000-468	11 Inch Adapter	The value choice for attaching your BCD
0100-006	Jetstream Mk3 Octopus	The recommended Octopus for the POSEIDON SE7EN
0650-032	Wing Man, Side Sling Case	Bring your bailout tank with you without bungees and straps
0100-005	Jetstream Mk3 (Black)	Perfect regulator for your bailout kit

COUNTER LUNGS

Art. no.	Description
6011-049	Standard Counter Lungs For the recreational rebreather diver. 6.2 liter volume.
6011-050	Large Counter Lungs For the larger or technical rebreather diver. 8.2 liter volume.

MATERIAL:

Ballistic Nylon

TECHNICAL FEATURE:

6.2 or 8.2 liter volume.

BACK MOUNTED COUNTER LUNGS

For divers preferring the back mounted set-up of their rebreather wing/harness. Made for the Poseidon Rebreather Wing/ Harness the Back Mounted Counter Lungs have the same material and specifications as the technical counter lungs.
Over-the-Shoulder or Back Mounted Counter lungs is a matter of personal preference.

MATERIAL: Ballistic Nylon

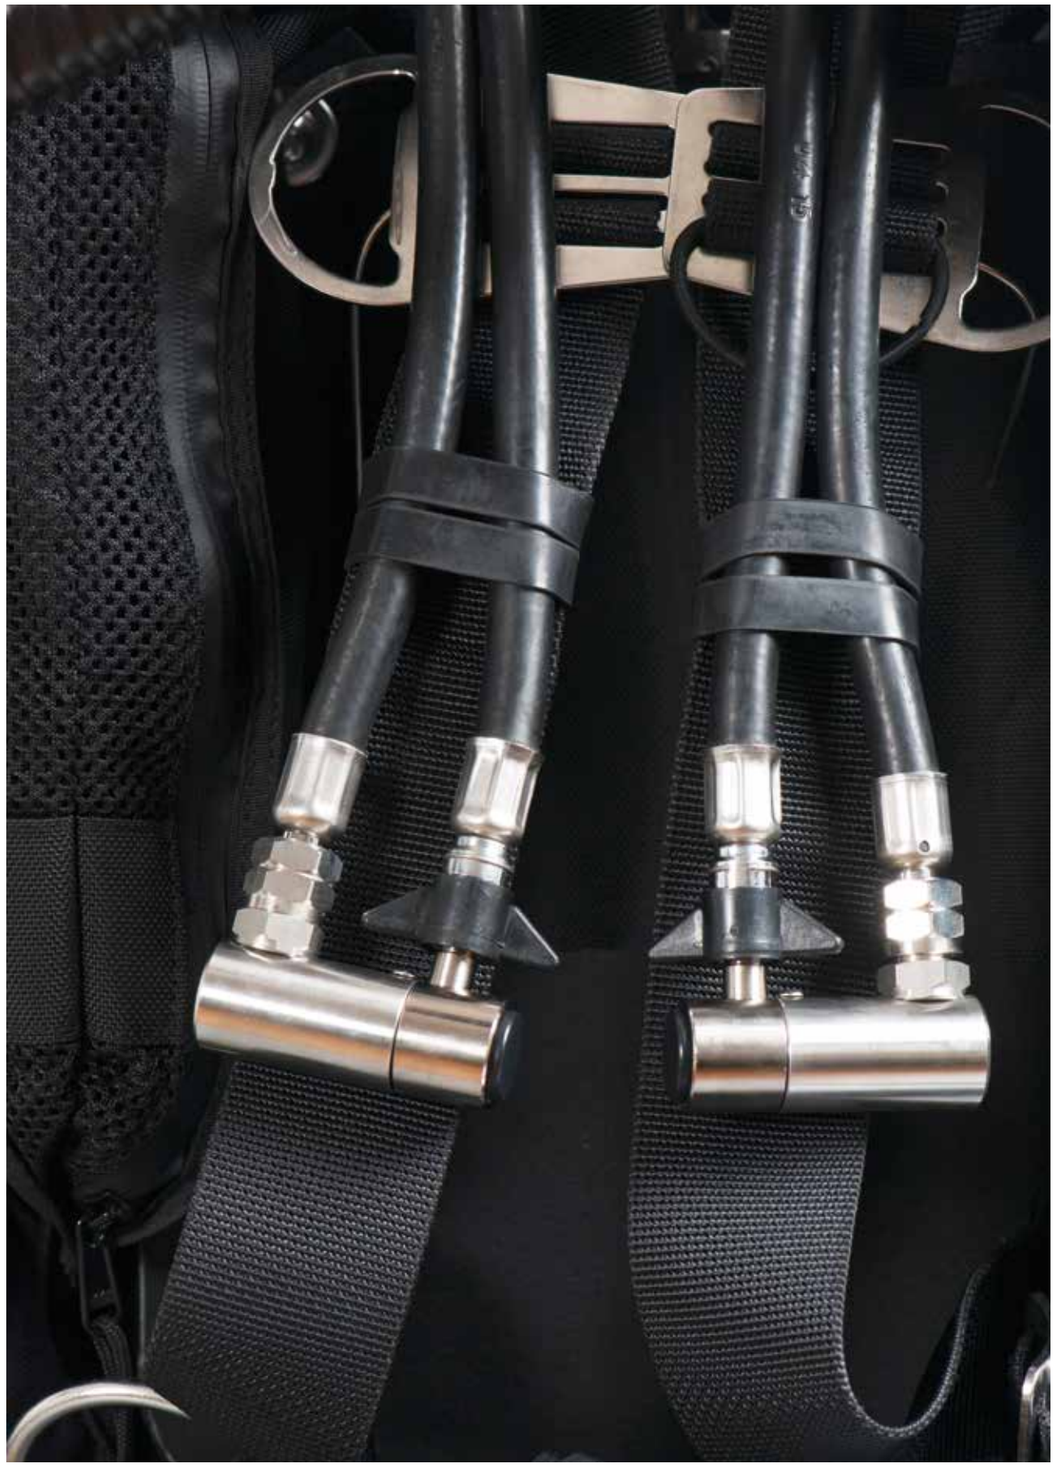

Art. no.	Description
6011-066	Back Mounted Counter Lungs For the technical rebreather diver. 8.2 liter volume.

MANUAL ADDITION VALVE PACK BMCL

Art. no.	Description
6011-074	Manual Addition Valve Pack - Metall for Back Mounted Counter Lungs 2 hose 110 cm

Rebreather & Accessories

BREATHING LOOP CC HOSE

These hoses will make it possible for you to customize the lengths of the hoses to fit you better.

The standard length sold with the POSEIDON SE7EN is 346 mm.

Art. no.	Description
0132-000	CC Hose 346 mm, pair
0135-000	CC Hose 286 mm, pair
0135-001	CC Hose 396 mm, pair

CYLINDER BRACKET COMPLETE

Art. no.	Description
0000-467	Cylinder Bracket Complete

LP-HOSE DIL 30 CM

Art. no.	Description
0132-006	Low Pressure Rubber Hose 9/16" – 30cm/8in – DIL

MOUTHPIECE G7

Art. no.	Description
0005-055	Mouthpiece G7

BLIND PLUG MOUTHPIECE

Art. no.	Description
0000-368*	Blind Plug Mouthpiece

3RD CELL CALIBRATION KIT

Calibration kit for use with 3rd cell holder. Makes O2 cell calibration easy to perform together with external computers.

Art. no.	Description
6011-055	3rd Cell Calibration Kit

BATTERY CHARGER

Art. no.	Description
6011-015	Battery Charger

POWER ADAPTER 12V

Art. no.	Description
6010-290	Power Adapter 12V

PLUG ADAPTERS 4-PLUG KIT

Art. no.	Description
6010-291	Plug Adapters 4-PLUG KIT

STAINLESS REBREATHER STAND

Art. no.	Description
6011-076	Stainless Rebreather Stand

CYLINDER INVERSION KIT

Art. no.	Description
6011-054	Cylinder Inversion Kit

REPACKABLE SCRUBBER CARTRIDGE

The scrubber is tested in accordance with the EN14143:2013 with the Poseidon SE7EN rebreather.

Art. no.	Description
6011-069	Repackable Scrubber Cartridge

SCRUBBER CARTRIDGE FILTER

Art. no.	Description
6011-070	Scrubber Cartridge Filter Pair

POSEIDON SOLID STATE 02 SENSOR

Digital sensor technology from Poseidon brings a quantum leap in reliability, PO2 accuracy and longevity- and enhances every aspect of your dive.

Art. no.	Description
6011-063	Poseidon Solid State O2 Sensor

O2 SENSOR (MOLEX)

Art. no.	Description
6010-206	O2 Sensor (Molex)

DISPLAY GAUNTLET

COLORS

Black

Art. no.	Description
0605-001	Display Gauntlet S
0605-002	Display Gauntlet L

MATERIAL:

Ballistic Nylon 1680, YKK Waterproof Zipper, Octupus Velcro.

CYLINDER QMR SET

The Cylinder Quick Mount Release (QMR) attaches your cylinders even quicker than before and with a perfect fit every time, just as you want them to be. The QMRs are made out of steel and will snap into place on the side of your scrubber canister house.

Art. no.	Description
0415-002	Cylinder QMR Set

TANK BAND STANDARD

COLORS

Black

Art. no.	Description
0000-116	Tank Band Standard

TANK STRAP & BUCKLE

COLORS

Black

Art. no.	Description
0415-001	Tank Strap & Buckle (Pair L&R)

MATERIAL:

Stainless Steel.

RB HANDLE

The stainless steel handle is easily mounted in combination with QMR adapter or 11 inch adapter.
This will make your rebreather easy to grab and carry.

Art. no.	Description
6011-019	RB Handle

MATERIAL:

Stainless Steel

TECHNICAL FEATURE:

Quick mount/dismount

QMR

The Quick Mount/Release adapter presents the fastest solution to mount and dismount your Poseidon SE7EN to your BCD/Wing.

Art. no.	Description
6011-078	QMR Rebreather BCD

MATERIAL:

Stainless Steel

TECHNICAL FEATURE:

Quick solution for mount/dismount

POSEIDON M28 COMPUTER

“The world’s most powerful dive computer”

The Poseidon M28 Dive Computer has set new standards for dive computer performance. It boasts maps, graphics, GPS, Dive-By-Wire™, and a host of features that deliver class-leading functionality that’s incredibly intuitive to use.

Computer & Accessories

POSEIDON M28

The main features of the M28 include:

> Powerful graphics thanks to a class leading 2.8” TFT LCD Color Display

> Highly intuitive user interface with two button control

> Enhanced SE7EN/MKVI functionality with the M28’s Rebreather Management System

> Dive-By-WireTM enables you to make changes to set-points and gases during dive. Integration is possible with Poseidon Pod Systems, HUD and HP Sensors

> Dual Deco Algorithm (DCAP and Bülhmann ZHL16C with gradient factors)

> Real-time GPS Surface Positioning and maps

> Depth rated to 200M/656 ft

Art. no.	Description
0600-200	Poseidon M28 Computer. Incl. Firmware CCR and Firmware Advanced OC. Carrying case, Dust bag, Charging Adapter and Bungee cord.
0600-210	Poseidon M28 Computer and CPOD/Solid State Sensor kit

M28 PROTECTIVE COVER

Art. no.	Description
0605-000	M28 Protective Cover, Black.
0605-030	M28 Protective Cover, Red

M28 SCREEN PROTECTION

Art. no.	Description
0002-164	M28 Screen Protection

CPOD INCL. SSO2 AND CABLE

Solid State O2 Sensor features:

> Absolute oxygen measurement

> Factory calibrated, no need for user calibration

> Fast and accurate

> Low power consumption

Art. no.	Description
6011-064	CPOD, T-Coupling, Poseidon Solid State O2 Sensor and Connecting Cable 1.25m/4ft

POSEIDON M28 CHARGING ADAPTER

Art. no.	Description
0005-394	M28 – USB C Charging Adapter

POSEIDON M28 BUNGEE CORD

Art. no.	Description
0000-938	M28 Bungee Cord

CONNECTING CAN CABLE

Art. no.	Description
0000-690	Connecting CAN cable, 1.25 m/4 ft.

BLIND PLUG BUS

Art. no.	Description
0605-005	Blind Plug BUS

T-COUPLING

Art. no.	Description
6011-059	T-Coupling

POSEIDON SOLID STATE O2 SENSOR

Art. no.	Description
6011-063	Poseidon Solid State O2 Sensor

CPOD

The Poseidon C-POD uses an integrated CAN bus to directly connect to the SE7EN or M28 network to monitor and log the required parameters.

Typical adaptations of the Poseidon C-POD with a M28 includes:

> Monitor loop PO2 individually or as back up.

> Deploy the Poseidon mouthpiece and HUD system.

> Deliver life-saving information on PO2, loop status and calculated decom pression.

Art. no.	Description
6011-058	CPOD

CPOD INCL. T-COUPLING

Art. no.	Description
6011-060	CPOD incl. T-Coupling

Valves

CYLINDER VALVE SINGLE

Art. no.	Description
0410-100**	Cylinder Valve M25x2 Single G5/8” 200 Bar

CYLINDER VALVE SINGLE O2

Art. no.	Description
0410-101**	Cylinder Valve M25x2 Single M26x2 150 Bar O2

CYLINDER VALVE SINGLE 90°

Art. no.	Description
0410-155*	Cylinder Valve M25x2 Single G5/8” 200 Bar 90°

CYLINDER VALVE SINGLE O2 90°

Art. no.	Description
0410-156*	Cylinder Valve M25x2 Single M26x2 200 Bar 90° O2

CYLINDER VALVE DOUBLE

Art. no.	Description
0410-120**	Cylinder Valve M25x2 Double G5/8” 200 Bar

INLINE VALVE BLACK

Art. no.	Description
0410-161	Inline Valve 3/4”, G5/8” 237 Bar, US with Burst Disk
0410-171	Inline Valve M25x2, G5/8” 232 Bar, EU
0410-173	Inline Valve M25x2, G5/8” 300 Bar, EU

INLINE VALVE GREEN O2

Art. no.	Description
0410-160	Inline Valve 3/4”, G5/8” 237 Bar O2, US with Burst Disk
0410-170	Inline Valve M25x2, M26x2 232 Bar O2, EU
0410-172	Inline Valve M25x2, M26x2 300 Bar O2, EU

THE POSEIDON WING AND BACKPLATE

The Wing & Backplate is tailored to fit the POSEIDON SE7EN but is also an excellent choice for SCUBA diving purposes.
The Poseidon Wing & Harness have been designed to sustain good buoyancy and fit. Therefore they are the preferable choice of buoyancy device.

Made in Ballistic nylon with an integrated deflate system and custom made back plate.

The webbing and buckle system is adapted from the Poseidon platform.

The black aluminum backplate is covered in Nylon for protection and a higher comfort.

The four D-rings will make it easy to attach your bailout tank/-s or anyother equipment you would like to take along on your dive.

COLLECTION COLORS

Black

Art. no.	Description
0336-164	Harness w. backplate
0338-060	Poseidon Wing WRB

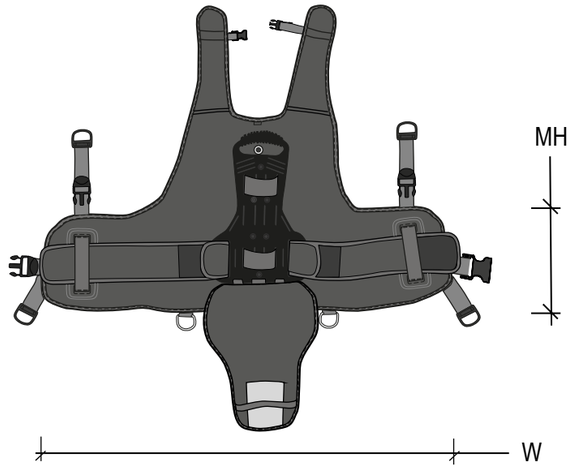

TECHNICAL FEATURES:

> Self retracting bladder
> Three dump valves
> Nylon covered black aluminum backplate
> Maximum buoyancy is 150 N which is reached within 5-8 seconds
> Dry weight 1,8 kg

MATERIAL:

Nylon 1680, Nylon covered black aluminum backplate

Size	W cm	H cm	MH cm

ORIGO BCD

The Origo BCD is constructed to the highest quality and durability using ballistic nylon, YKK zippers and hand crafted detailing.

MATERIAL:

Premium black or red version in Nylon 1680. YKK Waterproof Zippers. Inflator with stainless steel mechanism.

TECHNICAL FEATURES:

Integrated weightpockets.
Case for crotch strap,
Velcro for patches or gauntlet.

0337-464	Origo BCD Black M
0337-466	Origo BCD Black L
0337-467	Origo BCD Black XL

ONE WING & ONE HARNESS

Poseidon's single tank wing is now available in the ONE design. Featured in 2 colors and made in Cordura™ 1000. Designed for beginners and for more experienced divers, the One Wing 50 is a sport wing with excellent volume increase and superior bladder deflation capabilities. When deflated, the ClamRetract system helps to reduce size and drag to the minimum. Four dump valves and an inflator with a stainless steel mechanism ensure inflation and deflation is always controlled and safe; and the shape of the bladder compensates for the weight of the tank when submerged and gives you freedom to move in any direction. The narrow air passage behind the neck is designed not to impede head movement or foul regulators and hoses when inflated.

The One Wing is made for equipment with a negative weight in water that does not exceed 19 kg (41.6 lbs) and has a lifting capacity of 225 N. It comes with a double, non-flex tank-band tank attachment system and can also be equipped with integrated weight pockets, accessory pockets, metal back plate, pinbolt kit and D-rings.

The standard size has a waist belt with three rows of 40 cc holes; and the large size has six rows.

COLLECTION COLORS

Red Black

Art. no.	Description
0335-030	One Wing 50 Red
0335-060	One Wing 50 Black

FEATURES ONE WING:

Sport wing, Three dump valves, Inflator with a mechanism in stainless steel, Non-flex tankband, ClamRetract system.

COLLECTION COLORS

Black

Art. no.	Description
0336-064	One Harness Black Standard
0336-066	One Harness Black Large

Red only available on special order.

FEATURES ONE HARNESS:

Ergonomic harness, 40 cc system, Fits most sizes, Available in Standard and Large.

BLACK, RED & WHITE LINE MASK

High performance and high style are combined in the new Poseidon Line Mask, featuring LVSL© technology.

COLORS

Black Red White

Art. no.	Description
0720-160	Black Line Mask
0720-140	Red Line Mask
0720-110	White Line Mask

MATERIAL:

Ultra clear lens.
Frameless mask with skirt in high quality silicone and silicone strap.

TECHNICAL FEATURES:

Enhanced field of vision from angled lens.
Easy to clear low volume profile.
Flood resistant extra deep, ultra soft skirt.
Works great with beards.
Poseidon's Black Line Mask was inspired by rebreather divers who need the maximum field of vision combined with a minimal gas requirement toclear the mask. To answer their needs, we developed LVSL © Low-Volume Single-Lens technology to give a unique combination of features that benefit all divers.

THREEDEE

A low volume mask that fits most faces. A robust frame and with optical lenses.

COLORS

BK/black, with black silicone | BK/kevlar, with black silicone | BK/yellow, with black silicone | BK/yellow, with clear silicone | BK/red, with black silicone | Pink/white, with clear silicone

MATERIAL:

Our exclusive ultra-light two-lens mask has an ultra-light polymer frame and comfort fit skirt in high quality silicone.
The side buckles swivel 45 degrees and are strong and easy to adjust.
Colors include matte and metallic surfaces, and 'Poseidon yellow'.

TECHNICAL FEATURES:

Prescription lenses available online.
Lens 3D from -1,5 to -9,0 in steps of 0,5.
Comfort fit suits most face shapes.
Easy to clear thanks to low volume profile.

TECHNICA

Classic mask with ultra low volume.
Very popular among technical divers and free divers.

COLORS

Black/grey

Art. no.	Description
8684-GKGA BS	Mask Technica,grey/black gomma

MATERIAL:

A compact mask with rubberised surface and double glass.

TECHNICAL FEATURES:

Perfect free-diving mask. Easy to clear, ultra-low-volume.
Stand-out rugged, stylish look.
Poseidon's Technica Mask was inspired by free-divers who need the minimum gas requirement to clear their masks. The Technica Mask's rugged looks will set you apart from the crowd and perform flawlessly. Dive after dive.
